

Attrib

Object

Processus

PhaserRampExec

```
graph BT; PhaserRampExec --> Processus; Processus --> Object; Object --> Attrib;
```

The diagram illustrates a four-level hierarchy. At the base is 'PhaserRampExec', which points to 'Processus'. 'Processus' points to 'Object', which in turn points to 'Attrib' at the top. Each level is contained within a rectangular box, and the connections are represented by upward-pointing arrows.
