

Attrib

Object

Processus

PhaserRampExec

```
graph BT; PhaserRampExec --> Processus; Processus --> Object; Object --> Attrib;
```

The diagram illustrates a vertical hierarchy of four components. At the base is 'PhaserRampExec', which points up to 'Processus'. 'Processus' points up to 'Object', which in turn points up to 'Attrib' at the top. Each component is enclosed in a rectangular box, and the arrows indicate a directional flow from bottom to top.
